

Note. The numbers attached to the Roads, represent the distances in perches as measured from one fork or junction of Roads to the next. By adding those distances the exact length of any Road in the County, can be obtained in any direction, the sum will be in perches which divided by 320 (the number of perches in a miles) gives the number of miles in the road.

**EXPLANATION**

- |                             |                                    |
|-----------------------------|------------------------------------|
| S.E. indicates School House | Bapt. Ch. indicates Baptist Church |
| S.M. Saw Mill               | M.E.Ch. Methodist Episcopal Ch.    |
| G.M. Grist Mill             | B.S. Blacksmith Shop               |
| Ch. Church                  | W.S. Wheelwright Shop              |
| P.Ch. Presbyterian Church   | P.O. Post Office                   |
| D.R.Ch. Dutch Reformed      |                                    |
