

ILL CANAL

From picket No 32 at the junction of the Canal with Schuylkill third street, the line is continued towards the River Schuylkill on a more northwardly course as far as picket No 62, from which it is extended on a more westwardly course to a point in the vicinity of the Gray's ferry roads - Hence it is continued to the western termination on the River Schuylkill north of Dupuy's wharf and south of the United States Arsenal. -

The Canal in this distance will be made to cross Long lane near the southern corner of Henry Meyers field, and the Gray's ferry road and the Philadelphia Wilmington & Baltimore Rail Roads near the junction of Federal Street, and also to descend from the Summit level to tide water of the River Schuylkill by means of 3 lift locks. -

Philadelphia 4th May, 1839. -
