

SIMPLIFIED RULES FOR RUSSELL-SOUNDEX CODING

1. Never code the vowels (a, e, i, o, u) or w, h, and y.
2. The first letter of the surname is never coded (because the certificate is filed under this initial letter).
3. The remaining letters of the alphabet in a surname are coded as follows:

An Example

"Earhart"

<u>Code</u>	<u>Coding Process</u>	<u>Some Variations</u>
1. B f p v	"E" is the initial letter	663 Earhard
2. C g j k q s x z	"a" is disregarded	663 Ehrhard
3. D t	"r" is coded "6"	663 Ehrhart
4. L	"h" is disregarded	663 Ehrhaert
5. M n	"a" is disregarded	663 Erehart
6. R	"r" is coded "6"	663 Erhart
	"t" is coded "3"	

4. This is a system of three digits. If you have a name which codes with more than 3 numbers, use only the first 3 (Grisinger is coded as 625).
6 2 52 6
If it codes with less than 3 numbers, add 0's to the end (Hale is coded as 400, Hilt is coded as 430, Howe is coded as 000). This greatly simplifies the coding of long foreign names.

5. W and H do not separate double letters (two m's, two r's, etc.) or equivalents (letters in the same line of coding- cg, mn, dt, pf, cgsqz, etc.). Y does separate them.

Examples: Sokwzy 200 Iwanczyk 522
 Lighs 200 Mycyk 220
 Kolhler 460

6. If the initial letter of the surname is immediately followed by the same letter (Lloyd 300), or by its equivalent (Pfart 130) or equivalents (Sczemina 550), the identical letter or equivalent(s) should also be disregarded in coding.

Examples: Llewellyn 450
 Scull 400
 Scklar 460
 Ksiazkewicz 220
 Szczypinska 152

7. Remember that rule 5 applies in rule 6 too.

Examples: Zwkovick 120
 Scklar 460
 Sykes 220
