SIMPLIFIED RULES FOR RUSSELL-SOUNDEX CODING

1. Never code the vowels (a, e, i, o, u) or w, h, and y.

2. The first letter of the surname is never coded (because the certificate is filed under this initial letter).

3. The remaining letters of the alphabet in a surname are coded as follows:

An Example

"Earhart"

Code	Coding Process	Some Variations
1. B f p v	"E" is the initial letter	663 Earhard
2. C g j k q s x z	"a" is disregarded	663 Ehrhard
3. D t	"r" is coded "6"	663 Ehrhart
4. L	"h" is disregarded	663 Ehrhaert
5. M n	"a" is disregarded	663 Erehart
6. R	"r" is coded "6"	663 Erhart
	"t" is coded "3"	

4. This is a system of three digits. If you have a name which codes with more than 3 numbers, use only the first 3 (Grisinger is coded as 625).
6 2 52 6
If it codes with less than 3 numbers, add 0's to the end (Hale is coded as 400, Hilt is coded as 430, Howe is coded as 000). This greatly
4
43
simplifies the coding of long foreign names.

5. W and H do not separate double letters (two m's, two r's, etc.) or equivalents (letters in the same line of coding- cg, mn, dt, pf, cgsqz, etc.). Y does separate them.

Examples:

Sokwzy	200	Iwanczyk	522
Lighs	200	Mycyk	220
Kolhler	460		

6. If the initial letter of the surname is immediately followed by the same letter (Lloyd 300), or by its equivalent (Pfaft 130) or equivalents (Sczemina 550), the identical letter or equivalent(s) should also be disregarded in coding.

Examples:

Llewellyn	450
Scull	400
Scklar	460
Ksiazkewicz	220
Szczypinska	152

7. Remember that rule 5 applies in rule 6 too.

Examples:

Zwkovick	120
Schklar	460
Sykes	220
