

Fayette County
Robert Ocelly

412 as. & all.

(For Hon^l A Stewart Esqr.)

I have tabled this survy again carefully, and the error appears to ^{be} 1.5 in each Lat. & dep. If the Surveyor was sent out again to measure 26 lines as rough as these are, I doubt whether more than five of them would make the work close nearer than this does. I do not think the error of such importance as to require a resurvey and therefore return it again in the same condition. F.L. —
