

N.B. The claim of — Walley is said to interfere with the above represented survey of Barnabas Stier but as the above represented lines of the boundaries of the claim of the latter have been well marked marked upon the ground as the boundaries of the claim and that of the former said not to be found agreeable to the official return (for which they say they have a patent) and because there are no official papers at this office to show a return of — Walley's claim while Barnabas Stier was in possession of the land I have returned the same agreeable to his original claim as the earliest improved agreeable to the laws of the Commonwealth to entitle him to the same.
