

In pursuance of an order from the Board of property Dated Novemb^r 5th. 1792. I have, in making Browns survey attended carefully to the particulars therein mentioned, And find the situation of Longmores improvement to be as marked on the Plot at A and wholly included in the lines of the Tract called Popish Plains It appears to be in extent between one and two Acres a house has been formerly Erected but is now in Ruins, Near fifty fruit trees, principally Apple, are growing on the premises. I would also Observe that in runing the line that touches on the Improvement, Marshall being present, said that he had no claim within it, that the land he claimed lay all on the hill to the South^w_Ard of that line.
