# List of Consultants

# Pennsylvania Historic Resource Survey Form National Register of Historic Places Nominations

In order to assist property owners and others interested in documenting properties, the Bureau for Historic Preservation (BHP) maintains a list of consultants, through open request, who research and prepare Historic Resource Survey Forms (HRSF) and National Register Nomination Forms on a professional basis.

Consultants' experience and fees vary widely. We strongly recommend that you examine the qualifications and experience of several consultants, including recent examples of completed forms, before contracting for work.

Both sponsor of nominations and their consultants should be aware that the BHP processes HRSF submissions and National Register nominations on a priority basis. Please also be aware of current documentation requirements as presented in BHP publications: **How to Complete the Pennsylvania Historic Resource Survey Form** and **Pennsylvania Guidelines for Completing the National Register Form**. It must also be understood that the BHP determines whether documentation of a property is sufficient for National Register evaluation and whether National Register Forms are adequate and complete according to current federal and state standards. It is not uncommon for the BHP to request additional information to assess nomination priority or complete an evaluation of a survey form. Also, National Register forms are often returned for revisions before they are scheduled for review by the Pennsylvania Historic Preservation Board. The Board typically meets twice a year (call or write the BHP for a schedule). National Register Forms should be received at least 120 days before the anticipated Board meeting date (60 days for revised/resubmitted nominations).

For those interested in being listed as a consultant, please contact Carol Lee at:
