

- B. John Mitchell on the West Branch Route, 365 miles, 20 January 1826. This report includes his Field Book No. 4 and is contained in a manilla envelope.
- C. Judge Francis W. Rawle on the Clearfield Route, 39½ miles, 24 January 1826
- D. John Davies on the Juniata Route, 267 miles, as surveyed in 1824 by the late Commissioners James Clarke, Jacob Holgate, and Charles Treziulny and in 1825 by himself, 28 November 1825.

For profiles of the several explored routes, supra, see Map Book 14.

W2-e. 29c. JUNIATA DIVISION - Land Damages, etc. - Vol. 4

Here, the title is misleading: the volume is filled with correspondence, but a part of which is connected with the division per se; much of it concerns other divisions.

This correspondence is, however, of considerable importance: many of the letters bear upon the explorations in 1825 for a canal route across the Alleghenies and originate with canal commissioners, acting canal commissioners, engineers, and assistant engineers.

Represented are Wm. Darlington, canal commissioner; John Davies, exploratory engineer for a route along the Juniata in 1825; D. B. Douglass, exploratory engineer for a canal route in northwest Pennsylvania; --- Dewart, contributor of a map for a canal route between the Schuylkill and the Susquehanna; Thomas Enoch, canal commissioner at Pittsburgh in 1826;
